

MiCRA Biodiagnostics & Chamco

Evaluation of Anti-fungal Formulations for use on External Walls

Chamco International Ltd are specialists in anti-bacterial cleaning products. With over 30 years' experience in both food safety and chemical manufacturing, Chamco offer end to end solutions for manufacturers, retailers and individual clients. Chamco products are 100% natural and biodegradable and contain no alcohol or chlorine. They are environmentally safe, eco-friendly and ideal for use in the home, healthcare, farming and manufacturing applications.

Chamco contacted MiCRA Biodiagnostics for assistance with R&D in the area of natural product biocide development. The company wished to study the composition and efficacy of innovative formulations for the control of fungal and algal discolouration, as commonly found on the exterior walls of residential dwelling houses, commercial buildings and infrastructure.
